Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

Reference is made to the following documents:

D1: DE 35 04 441 A1
D2: EP-A-1 273 528
D3: US 2003/077359 A1

The documents D1 and D2 are regarded as being the closest prior art to the subject-matter of claim 1, and show coffee pods from which the subject-matter of claim 1 differs in that a central part of the pod is slightly sunken in relation to the sealing plane.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as improving the quality of the beverage brewed from the pod.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) because none of the available prior art documents shows a pod having a sunken central part. D3 shows a sunken coffee pod, but states that only the compacted coffee is sunken, not the pod itself (see last sentence of paragraph 66).

Claims 2-4 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

Re Item VIII

Certain observations on the international application

Claims 3 and 4 lack clarity because they mention a lower, resp. equal, weight, without mentioning to which standard these weights have to be compared.
